ACCOMPLISHMENTS

I've been learning front-end web development for a year and able to work with single, multi-page applications. In my projects, I have completed a wide range of tasks such as crud operations, connecting Web APIs to the back-end, animating react components, converting Figma designs to web pages, writing reusable codes for better performance, responsive design, state management with context api, form validation and submission, authentication, and many more. I feel comfort with working React ecosystem since it uses virtual dom which makes easy life of client-side developers.

SKILLS & ABILITIES

Hard skills:

- HTML5, CSS3, SCSS, Bootstrap5, tailwind
- Javascript(OOP, Promises, Event loop,
- Objects,RegExp) React Ecosystem (Hooks,
- Routes (protected), Authentication,CRUD operation) Context-API (state management)
- Axios (data receiving + requesting)
- Styled-Components, Material-Ui (for design implementation) Git, GitHub Swagger +
- Postman (confident enough to understand)
- English Lang: (Intermediate) Russian Lang: (Elementary) Uzbek Lang: (Native)

Soft Skills:

Critical Thinking, Time Management, Math, Problem Solving, Effective Communication, Awesome Teammate

EDUCATION

Samarkand state university of veterinary medicine, animal husbandry and biotechnology(2018 - 2022)

Faculty of veterinary medicine and medicine

Najot Ta'lim – Tashkent, UZBEKISTAN – (2022 June)

First 3 month (strong introductory level of landing and multiple pages)

Next 4 month (Concept of JavaScript language, understanding how JS works behind the scene event loops, call stack, OOP)

Rest of Month (React ecosystem)
